

Special Project for the General Biology Class

Your assignment is to plan, produce, record, and publish a music video about biology on YouTube at <http://www.youtube.com>. You may choose any topic related to biology but must have approval before publishing to YouTube. Your final video should be limited to approximately 3 minutes in length and will be graded on the basis of accuracy, content, entertainment value, and quality. You may work with others, but no more than four students can submit the same project for a grade.

Your YouTube video should be published with an appropriate title, which will preferably be the biology topic you choose for production. In the description, you should include a statement such as, “this is a video for Dr. Bidlack’s class, performed by...and then list the names of the individuals involved in the project.”

Once you have completed your video and you have confirmed that it has been published on YouTube, you should send an e-mail to Dr. Bidlack at jbidlack@uco.edu with a short description of the video, the names of individuals who are submitting the project, and an Internet link that can be used to view the video.
