

BIOLOGY 1304

INTERNET PROJECT

Dr. Jim Bidlack

INTERNET PROJECT

This assignment is designed to acquaint students with resources available for plant biology on the Internet and involve students with materials for the website that accompanies this course.

To complete this project, you will be assigned a topic in class and use the Internet to find learning materials on that topic. You will be responsible for working with Dr. Bidlack to:

1) add new links to the Multimedia Educational Resource for Learning and Online Teaching (MERLOT, <http://www.merlot.org>), and 2) modify existing materials found in the Courses link at <http://biology.ucok.edu/bidlack>.

More information will be provided in class about this Internet Project.
