<http://biology.uco.edu/bidlack/>

Dr. Jim Bidlack

301B Howell Hall

Phone: (405) 974-5927

E-mail: jbidlack@uco.edu

Office Hours: M W 3:00 - 3:50 PM

F 1:00 - 3:50 PM

*All students must attend PLANT PHYSIOLOGY LECTURE. It also meets Mondays and Wednesdays from 4:00 to 6:50 PM.

| <u>Lab</u> | <u>Date</u> | <u>Lab topic</u> | <u>Experiment</u> | <u>Pages (in Manual)</u> |
|-----------------|-------------|--|-------------------|--------------------------|
| January | | | | |
| 1. | 11 | Pipetting, pH, and buffers | 1 | 4 |
| | 18 | Additional exam material | | |
| 2. | 25 | Spectrophotometry | 2 | 5-6 |
| February | | | | |
| 3. | 1 | Centrifugation and protein determination | 3 | 7-8 |
| 4. | 8 | Photosynthesis: Hill reaction | 4 | 9-11 |
| 5. | 15 | Tetrazolium test for dehydrogenase activity | 5 | 12 |
| 6. | 22 | Malate dehydrogenase in soybean Part one: Planting | 6 | 13-15 |
| March | | | | |
| 7. | 1 | Malate dehydrogenase in soybean Part two: Organelle isolation | 6 | 15-16 |
| 8. | 8 | Malate dehydrogenase in soybean Part three: Protein and MDH | 6 | 17 |
| 9. | 22 | Malate dehydrogenase in soybean Part four: SDS-polyacrylamide electrophoresis | 6 | 18-21 |

| Lab | Date | Lab topic | Experiment | Pages (in Manual) |
|--------------------------|-------------|------------------------------------|-------------------|--------------------------|
| March (continued) | | | | |
| 10. | 29 | Plasmolysis | 7 | 22 |
| April | | | | |
| 11. | 5 | Water potential | 8 | 23-24 |
| 12. | 12 | Minerals and nutrient deficiencies | 9 | 25-27 |
| 13. | 19 | Plant growth regulators | 10 | 28 |
| 14. | 26 | Tissue culture | 11 | 29 |

GRADING AND DUE DATES FOR LAB REPORTS

| Lab | Due date | Points |
|--------------|-----------------|---------------|
| 1 | 1/18 | 10 |
| 2 | 2/1 | 10 |
| 3 | 2/8 | 20 |
| 4 | 2/15 | 30 |
| 5 | 2/22 | 20 |
| 6-9 | 3/29 | 100 |
| 10 | 4/5 | 20 |
| 11 | 4/12 | 30 |
| 12 | 4/19 | 30 |
| 13 | 4/26 | 20 |
| 14 | 4/26 (in class) | 10 |
| TOTAL | | 300 |

Summaries of research papers or proposals discussed during lab periods should be stapled to the front of the lab report and will be used in determining total points awarded for each report.

LABORATORY REPORTS

BIOLOGY 3024, CRN 21369

PLANT PHYSIOLOGY LAB

There is a computer room (Science Computer Lab) located in Howell Hall that you may use for writing lab reports. It is generally open 8:00 AM to 5:00 PM MTWRF.

1. Lab reports are required and must be handed in **BEFORE LAB** on the day the report is due.
2. Reports will be graded on the basis of completeness, clarity, and creativity.
3. Points as listed on the tentative laboratory syllabus will be used for the value of each report. The total value for all 14 lab reports is 300 points. That is 300 out of the total 800 points allocated for the course, or 37.5% of the final grade.

4. Format for your lab reports will be as follows:

Article Summary (if needed): Write a one-page synopsis of the article and issues discussed during class. Staple this summary to the front of your report.

Title: Try to convey the objective(s) of the experiments in a brief title.

Introduction: Briefly explain the purpose of the experiments and give the reader an idea of practical applications. This should be about 1 to 4 sentences in length.

Procedure: Provide a summary of methodology. Make it short and simple. Briefly explain how equipment and specimens were used. This section should be less than one paragraph in length.

Results and Discussion: This section should be written to enable the reader to conceptualize observations, tables, graphs, and other figures presented in the report. All results should be neatly presented in an easy-to-read, straightforward, and entertaining manner. Highlight the major points of each experiment and provide your interpretation of results. This is the most important part of your laboratory report.

Conclusions: Briefly (less than 5 sentences) summarize key concepts and explain why they are important in studying plant physiological processes. Tell what you learned from your investigations.

5. Ease of reading, neatness, and entertainment value all contribute towards excellent lab report grades. Make an attempt to make the report enjoyable to read and make a special effort to explain what you learned in the conclusions.
